

epos

The ELS-3 mini monitor maintains the high standards expected of any product bearing the Epos name but now at a lower cost.

Designed not only for high performance two channel operation, these competitively priced Epos speakers will further satisfy a requirement in the 5.1 home cinema market, ensuring there is no need to compromise the audio quality in the name of home entertainment.

Utilising a two-way bass reflex design, the ELS3 incorporates a 130mm woofer with injection moulded polypropylene cone with dust cap and rubber rolled surround on a heavy die-cast aluminium chassis. It has a dual magnet and shielding can, further enhancing its use in a home theatre application.

The 25mm aluminium dome neodymium tweeter is an entirely new Epos design and features the Epos logo directly moulded onto the faceplate. In true Epos style, the ELS3 has a minimalistic crossover.

In a deviation from the Epos real wood veneer cabinet, this new ELS3 cabinet features a vinyl wrap finish allowing the cost to be highly competitive. The choice of three colours remains, enabling the addition of these speakers to complement earlier models, should they be desired for use in a rear channel application.

As you would expect from the manufacturer of such a well-respected brand, this exciting Epos ELS3 has a performance level that has to be heard to be believed.

Configuration 2 way

Power Handling 100 W max. Speech and Music.

Frequency Range 65 Hz – 20 kHz.

Impedance 8 Ohm nominal.

Sensitivity 87dB/2.83V/1m.

Amplifier Compatibility 25 – 100 Watts.

Positioning Not less than 20 cm (8") from rear wall.

Finish Cherry, Red Cherry, Black Oak Vinyl wrap.

Cabinet 18mm MDF wrap and front baffle

Size HxWxD – mm / ins 175 x 270 x 195

Packaged One pair per carton.

Weight 4.5 kg each
