

epos

This is the larger of the two bookshelf models. An evolution of the earlier M12 and ES 12, it is possible to trace its history back to the ES11 designed by Robin Marshal in 1990.

Still a two way bass reflex design, the M12.2 features a 150mm woofer complete with phase plug. The plastic chassis used in the original M12 was replaced by an all new Epos die cast chassis. The tweeter used in the M12.2 is a 25mm aluminium dome with Ferro-fluid cooling and neodymium magnet system.

As you would expect with a speaker of this quality, there is provision for bi-wiring via the two sets of 2 way binding posts.

The real wood veneer cabinet, available in a choice of light cherry, dark cherry or black, is beautifully finished and the metal mesh grille can be easily removed if desired.

Listening to the new M12.2 is a delight. If used in a home cinema application, the addition of M5 speakers for rear channel use together with the M8 centre channel guarantees a home theatre speaker system of the highest caliber.

When placed on the optional ST12 open frame stands designed for this particular model, it is said they perform at their best.

Power Handling: 120 Watts Max
Frequency Response: 54Hz – 20kHz
Impedance: 8 Ohms Nominal
Sensitivity: 87dB/1 watt/1 metre
Amplifier Compatibility: 25 – 150 Watt

Configuration: 2 Way

Weight: 8kg

Size W x H x D (mm): 200 x 375 x 250

Finish Type: Real Wood Veneer

Finishes: Light Cherry, Dark Cherry, Black Ash
