

epos

The M5 speaker is the smaller of the two bookshelf speakers in the current M series range of products.

This fully shielded 2-way bass reflex design speaker was designed by the Epos engineering team to meet the demands of today's home theatre requirements. Importantly the speaker equally stands its ground in the world of two-channel audio.

The M5 uses a 25mm metal dome tweeter with a neodymium magnet and plastic moulded front plate. The 137.5mm woofer uses a custom Epos die-cast aluminium chassis and features a pole mounted phase plug. The speaker has provision for bi-wiring.

If the M5 is used in a home cinema application, the Epos M8 centre channel is the ideal choice.

Epos has designed a stand suitable for the M5 – the ST35, available in either black or silver.

The choice of three finishes in real wood veneer ensures the speaker will integrate into the furnishings of any home. With a veneered front baffle, the M5 is equally attractive without its metal mesh grilles and the addition of the Epos name moulded into the tweeter is an elegant feature.

Power Handling: 75 Watts Max
Frequency Response: 60Hz – 20kHz
Impedance: 4 Ohms Nominal

Sensitivity: 88dB/1 watt/1 metre

Amplifier Compatibility: 25 – 100 Watt

Configuration: 2 Way

Weight: 5.6kg

Size W x H x D (mm): 175 x 326 x 210

Finish Type: Real Wood Veneer

Finishes: Light Cherry, Dark Cherry, Black Ash
